

#Repurposing for play

PVC

- Utilize a variety of connector types
- Cut pipes in a variety of lengths with multiple of each length
- Add water and funnels for additional building challenges

Building *play*!

- Can you build a structure that is free standing?
- Can you build something to use for your game?
- Can you build a system that will allow water to flow uphill?
- Can you build a system that will allow water to pour out of more than one opening at one time?
- Take a picture of how you used your kitchen utensils and share it

Empowering the facilitation of pure play for every child.
